12. DECLARATION

(i) Declaration by the inventor(s)

(In case the applicant is an assignee: the inventor(s) may sign herein below or the applicant may upload the assignment or enclose the assignment with this application for patent or send the assignment by post/electronic transmission duly authenticated within the prescribed period).

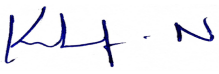

I/We, the above-named inventor(s) is/are the true & first inventor(s) for this Invention and declare that the applicant(s) herein is/are my/our assignee or legal representative.

(a) Date: 21-09-2026

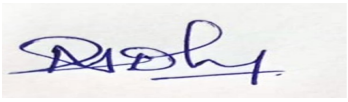

(b) Signature(s)

1.a)Signature(s): 

b)Name(s): Mrs Kavitha V

2.a)Signature(s): 

b)Name(s): Keerthi Priya N

3.a)Signature(s): 

b)Name(s): Deetchana M

(ii) Declaration by the applicant(s) in the convention country

(In case the applicant in India is different than the applicant in the convention country: the applicant in the convention country may sign herein below or applicant in India may upload the assignment from the applicant in the convention country or enclose the said assignment with this application for patent or send the assignment by post/electronic transmission duly authenticated within the prescribed period)

I/We, the applicant(s) in the convention country declare that the applicant(s) herein is/are my/our assignee or legal representative.

NA

(iii) Declaration by the applicant(s)

I/We the applicant(s) hereby declare(s) that: -

We are in possession of the above-mentioned invention.

~~The provisional/complete specification relating to the invention is filed with this application.~~

~~The invention as disclosed in the specification uses the biological material from India and the necessary permission from the competent authority shall be submitted by us before the grant of patent to us.~~

~~There is no lawful ground of objection(s) to the grant of the Patent to us.~~ ~~We are the true & first inventor(s).~~

~~We are the assignee or legal representative of true & first inventor(s).~~

~~The application or each of the applications, particulars of which are given in Paragraph-8, was the first application in convention country/countries in respect of my/our invention(s).~~

~~We claim the priority from the above-mentioned application(s) filed in convention country/countries and state that no application for protection in respect of the invention had been made in a convention country before that date by me/us or by any person from which I/We derive the title.~~

~~Our application in India is based on international application under Patent Cooperation Treaty (PCT) as mentioned in Paragraph-9.~~

~~The application is divided out of our application particulars of which is given in Paragraph-10 and prays that this application may be treated as deemed to have been filed on 31-08-2026 under section 16 of the Act.~~

~~The said invention is an improvement in or modification of the invention particulars of which are given in Paragraph-11.~~

1. **TITLE OF THE INVENTION:**

CAMPUS PLACEMENT DRIVE SCHEDULING AND STUDENT PLACEMENT TRACKING MANAGEMENT PORTAL

1. Field of the Invention

The invention pertains to the field of digital campus recruitment and placement management systems. It provides a centralized web-based platform for managing student records, placement drives, eligibility verification, applications, interview schedules, placement status, and offer letters. The system enables coordinators to organize recruitment activities efficiently, while students can access suitable opportunities, apply for drives, monitor applications, and manage their placement details.

2. Background of the Invention

Campus recruitment requires handling student records, company drives, eligibility conditions, applications, interviews, and offer letters. Conventional methods such as spreadsheets, emails, and messaging platforms may cause information gaps, repeated data entry, and communication delays. CampuConnect offers a centralized web-based solution that organizes these activities in one place. It manages student details, placement drives, eligibility verification, applications, interview schedules, placement progress, and offer letters, thereby simplifying and streamlining the recruitment process.

3. Objectives of the Invention

The main objectives of this invention are:

- To develop a centralized digital platform for managing campus placement activities.
- To maintain student academic, personal, and placement-related information.
- To allow placement coordinators to create and manage placement drives.
- To automatically identify students who satisfy the eligibility criteria of a placement drive.
- To enable eligible students to view and apply for placement opportunities.
- To digitally track student applications and recruitment status.
- To manage interview schedules and placement-related information.
- To track placed and non-placed students.
- To manage and track offer letters received from companies.
- To allow students to upload resumes and maintain their skills and profile information.
- To reduce manual effort, paperwork, and communication gaps in placement management.
- To provide centralized and updated placement information for coordinators and students.

4. Summary of the Invention

The proposed invention is a web-based campus recruitment portal developed to bring student information and placement activities together on a single platform. It provides dedicated access for Placement Coordinators and Students. Coordinators can handle student records, placement drives, eligibility rules, applications, placement details, and offer letters, while students can update their profiles, upload resumes, add skills, explore suitable opportunities, apply for drives, and monitor their placement progress. A centralized database and automated eligibility evaluation help streamline the recruitment process and maintain offer letter records efficiently.

5. Brief Description of Drawings

- Fig. 1: Architecture Diagram

6. Detailed Description of the Invention

6.1 System Overview

The proposed system is a web-based campus placement management portal that digitally manages student information, placement drives, applications, interviews, placement records, and offer letters. It provides a centralized and secure platform to improve the efficiency, accuracy, and transparency of the campus recruitment process.

6.2 System Modules

a) Student Management Module

This module maintains and organizes student records, including:

- Personal and academic information
- Skills and resume details
- Adding, updating, and importing student records

b) Authentication and Role Management Module

This module controls user access by providing:

- Secure login for students and placement coordinators
- Student accounts created by the coordinator
- Role-specific access and password update options

c) Placement Drive and Eligibility Module

This module supports placement opportunity management through:

- Company, role, package, and drive details
- Definition of eligibility requirements
- Automatic matching of students with suitable drives
- Management of deadlines and drive schedules

d) Application and Interview Management Module

This module manages the recruitment process by enabling students to:

- View suitable placement opportunities and submit applications
- Monitor their application progress
- Access interview dates, timings, and other details
- Avoid submitting multiple applications for the same drive

e) Placement and Offer Letter Management Module

This module maintains final placement information by providing:

- Records of selected and placed students
- Company and salary package details
- Offer letter upload and management
- Tracking of offer letters as Pending or Received

7. Working Methodology

- Coordinator logs into the portal and adds student records.
- Coordinator creates placement drives with required eligibility conditions.
- The system automatically identifies students who meet the criteria.
- Eligible students view the drive and submit their applications.
- Coordinators review applications and schedule interviews.
- Selected students are updated as placed in the system.
- Coordinators upload the respective offer letters.
- Offer letter status is updated and students can view their placement and offer letter details through the portal.

8. Advantages of the Invention

- Reduces manual placement-related work.
- Centralizes student and placement information.
- Automates eligibility verification.
- Minimizes duplicate applications and data errors.
- Simplifies application and interview tracking.
- Provides organized placement status management.
- Tracks placed students and offer letter status.
- Allows students to manage resumes and skills.
- Reduces dependence on spreadsheets and scattered communication.
- Improves accessibility, transparency, and efficiency of placement activities.

9. Industrial Applicability

The proposed system can be implemented in:

- Colleges and universities
- Training and placement departments
- Engineering and professional institutions
- Arts and science colleges
- Campus recruitment and career management
- Student placement monitoring and coordination systems

10. Novelty of the Invention

The proposed system uniquely integrates:

- Student and coordinator management
- Placement drive scheduling and eligibility checking
- Application, interview, and placement tracking
- Offer letter management
- AI-assisted insights on Student and Coordinator dashboards
- Reuse of stored student profile details during applications

The centralized platform connects the complete placement workflow, reducing manual records and scattered communication while providing intelligent dashboard-based insights.

11. Inventive Step

The inventive step lies in integrating student management, eligibility checking, applications, interviews, placement tracking, and offer letter management into one centralized portal. The system uses stored student data to automate eligibility verification and track the recruitment process from application to placement, reducing manual coordination and improving overall efficiency.

12. Claims

Claim 1:

A campus placement portal that centrally manages student, placement drive, application, interview, placement, and offer letter data.

Claim 2:

The system enables coordinators to create student accounts and manage placement drives through secure access.

Claim 3:

The system determines student eligibility using predefined academic and placement requirements.

Claim 4:

Eligible students can apply for drives while duplicate applications are restricted.

Claim 5:

The system records application progress through stages such as applied, shortlisted, interviewed, selected, and placed.

Claim 6:

The system records placement details and monitors offer letters as pending or received.

Claim 7:

Students can manage their profiles, skills, resumes, applications, and placement information.

Claim 8:

Role-based authentication ensures that students and coordinators access only their permitted functions.

Dated this 20 th day of September 2026

ABSTRACT OF THE INVENTION

The proposed Campus Placement Drive Scheduling and Student Placement Tracking Management Portal is a web-based application designed to centralize and streamline campus placement activities. The system provides a common platform for placement coordinators and students to manage student information, placement drives, eligibility requirements, applications, interview schedules, placement status, and offer letters. The portal reduces dependence on manual records, spreadsheets, emails, and other scattered communication methods used for managing campus recruitment activities.

The system allows placement coordinators to create student accounts, maintain student records, create placement drives, define eligibility criteria, monitor applications, schedule interviews, update placement status, and manage offer letters. Students can log in using coordinator-created credentials, maintain their profile information, upload resumes, add skills, view eligible placement opportunities, and apply for suitable drives. During application, student information such as name, roll number, department, academic performance, skills, and resume can be retrieved from the centralized database, reducing repetitive data entry.

The proposed system also provides eligibility checking based on criteria such as department, CGPA, academic percentages, arrears, and other placement requirements. Submitted applications can be tracked through stages such as Applied, Shortlisted, Interview Scheduled, Selected, Rejected, and Placed. For placed students, the system provides offer letter tracking by identifying whether the corresponding offer letter has been received or is still pending. Coordinators can upload offer letters, while students can view or download their available offer letters through the portal. Thus, the proposed invention provides a centralized, structured, and efficient approach for managing the complete campus placement lifecycle from student registration by the coordinator to placement and offer letter tracking.
